- Reduces the negative impacts of climate change effects by supporting the local community.

On Season vs Off Season

- On Season: emergency relief for community
- Off Season: multi use community center

02

The Green & Social Activity

Climate Change Adaptation and Resilience

Adaptive Solution

The community centre is a way to cope with the severe physical effects of climate change.

Resilient

Setting up the centre so that is resilient to the surrounding physical dangers.

Warning

We will have a website giving updates on the ongoing dangers in the community.

People

Our main goal is to support locals who need basic human needs during and after negative climate effects.

Summary

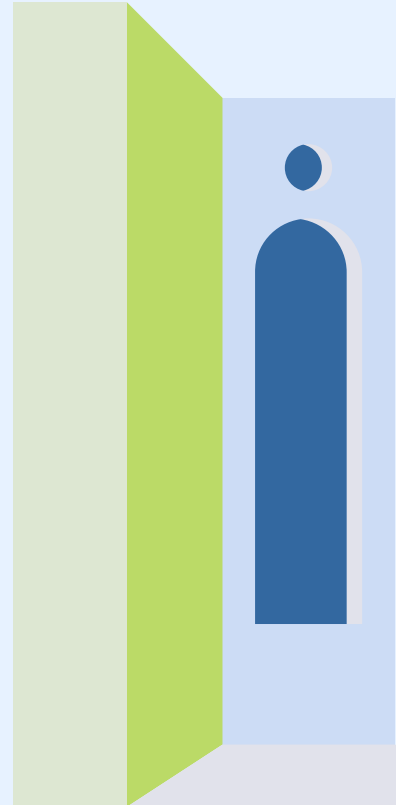

- Environmental Emergency Procedures have a glaring, widening gap
- Another gap in the social & support services available
-

We aim to bridge both gaps individually while being respectful of the unique community they exist within.
